1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

✓ As to claim 1, "wherein the object comprises an electronic purchase" is indefinite. How can an object comprise a purchase?

✓ As to claim 6, "wherein the object comprises a login event" is indefinite. How can an object comprise an event?

OK As to claim 9, there is no antecedent basis for "the Internet"

✓ As to claim 9, "the objects comprise...login events, and electronic purchases" is indefinite. How can objects comprise events and purchases?

✓ As to claim 12, "wherein the objects comprise login events" is indefinite. How can the objects comprise events?

✓ As to claim 18, "wherein the objects comprise electronic purchases" is indefinite. How can the objects comprise purchases?

Claims 2-5, 7, 8, 10, 11, and 13-17, depend from an indefinite antecedent claim.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

4. Claims 1-24 as definite, are rejected under 35 U.S.C. 102(e) as being anticipated by Montoya.

Montoya teaches the claimed method and structure for assigning object identifiers including a global positioning system receiver (column 4, lines 2-4), the use of an identifier which the provided location and time information in an encoded format (column 4, lines 36-39), object (14), computer hardware device (Figure 2), location (latitude, longitude, and altitude, column 4, lines 36-39), time information (time offset, column 4, lines 36-39), and an identifier which includes encoded information ("code", column 4, lines 36-39).

In column 4, lines 36-39 of Montoya, the location identifier is indicated to comprise "latitude, longitude, altitude, and time offset". The "latitude, longitude, altitude", corresponds to the claimed location, and the "time offset" corresponds to the claimed time information. Since the location identifier recited in column 4, line 38 of Montoya contains location and time information, the location identifier recited in column 4, line 38 of Montoya reads on the claimed object identifier.
